Acknowledge Vehicle Remarketing

Acknowledge Vehicle Remarketing Guidelines

Overview

This document is a guideline on how to use the Acknowledge Vehicle Remarketing Business Object Document (BOD). Acknowledge Vehicle Remarketing has been defined in the context of STAR for the Automotive Retail Industry. The scope of this BOD is to define the Acknowledge Vehicle Remarketing process for individual consumers who service their automobiles through their OEM's authorized Dealers. The focus is on Dealer and OEM interactions, not third party organizations. NOTE: Although this is the traditional use of the Acknowledge Vehicle Remarketing, this BOD could be used to send Acknowledge Vehicle Remarketing information between any two business parties.

Implementation Guidelines provide detailed information regarding the structure and meaning of the Acknowledge Vehicle Remarketing BOD and corresponds directly to the Acknowledge Vehicle Remarketing schema. In addition to structure and meaning, the Implementation Guidelines identify various business rules for specific fields/components that due to their nature, i.e. field interdependence, are not possible to express using schema. Please note that although these business rules are not included in the schema, they **MUST** be followed to be STAR Compliant. Therefore, the Acknowledge Vehicle Remarketing Implementation Guidelines must be used in concert with the Acknowledge Vehicle Remarketing schema during development and should **NOT** be considered a supplement or substitution to the schema. For more information regarding STAR XML Data Compliance, please review the STAR Data Compliance Guidelines document located on the STAR Web site.

For a copy of the corresponding Acknowledge Vehicle Remarketing schema, please download the appropriate STAR schema repository from the XML portion of the STAR website (www.starstandard.org). Prior to downloading the schema, users are encouraged to download the STAR XML Reference/Implementation document also located on the XML portion of the STAR website. This document provides an overview of the STAR BOD development methodology, how to download and read STAR schema, and various frequently asked questions related to the implementation of STAR BODs.

STAR has followed the Open Application Group's Business Object Document methodology to develop the Acknowledge Vehicle Remarketing BOD. Where possible, STAR has mapped to existing OAGI fields and components. Note however that the STAR Acknowledge Vehicle Remarketing BOD is unique to the Retail Automotive industry and is not an extension of any existing OAGIS BODs.

For more information on the Open Applications Group's BODs and related documentation please refer to the Open Applications Group's Web site at (www.openapplications.org).

Schema Field Usage

STAR uses the same Noun in the schema for all the Noun/Verb combinations of the Acknowledge Vehicle Remarketing except the Get verb. Please refer to each Noun/Verb combination within this document to understand the requirements for each specific BOD. Although the Noun will always have every field defined for the Noun in the schema, each Noun/Verb combination may not use all of the fields. If a field is not used by a BOD, it will be noted in the business rules.

Acknowledge Vehicle Remarketing

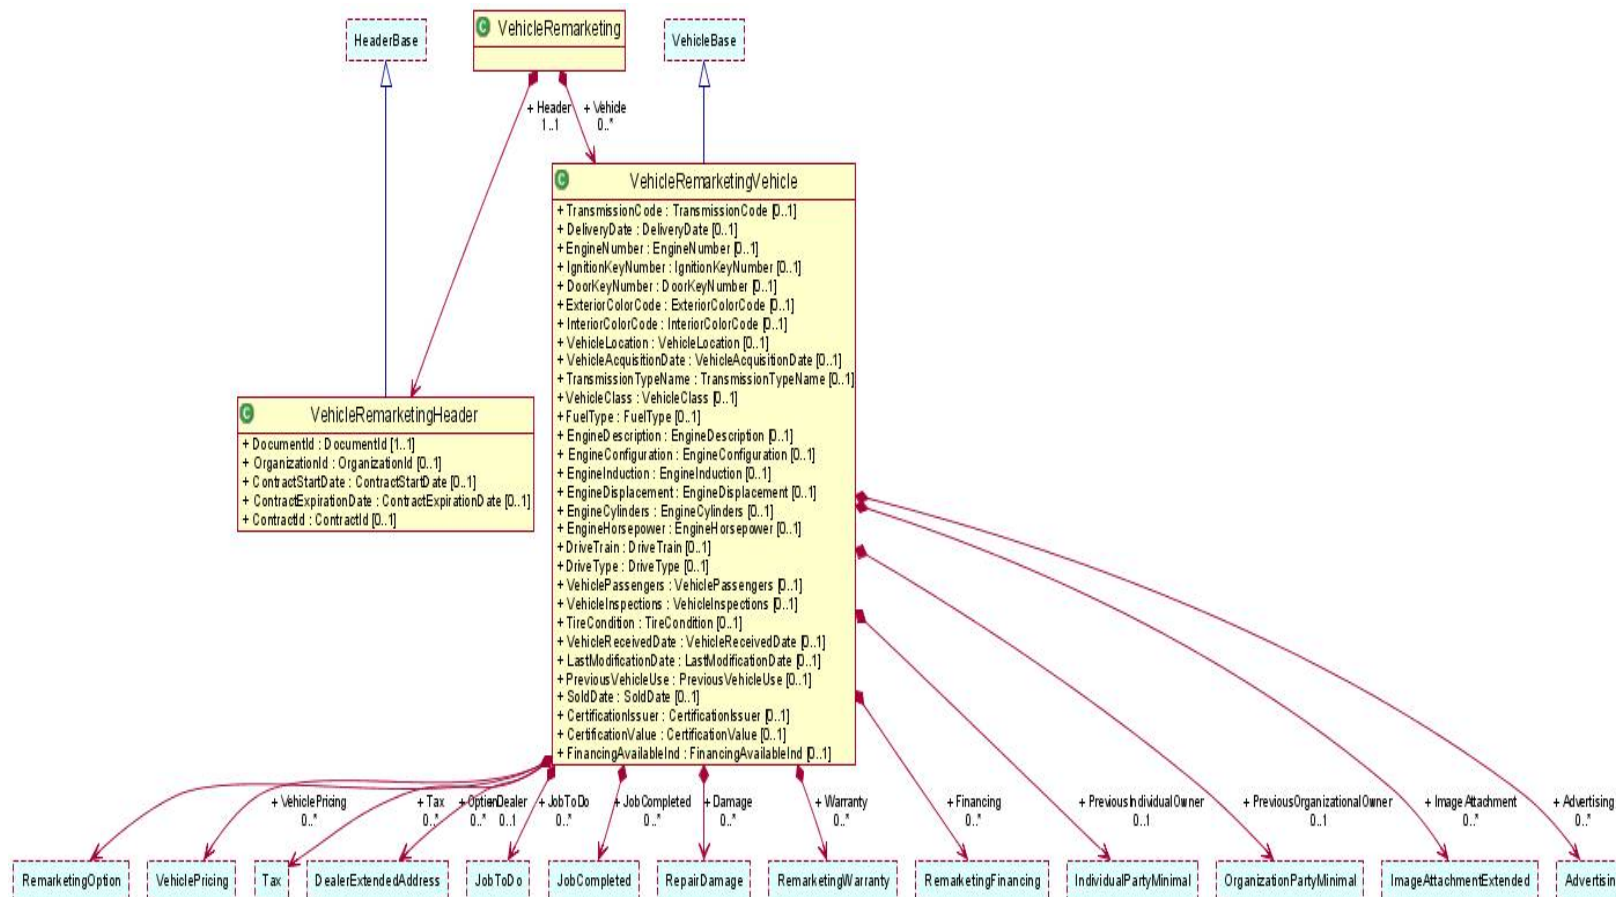

Business Scenario

BUSINESS SCENARIO MISSING. Please make sure it is defined in the build script.

Acknowledge Vehicle Remarketing

Relationship Diagram

The following is a representation of the Noun for this BOD. It is a high level overview provided to give an idea of the hierarchy of the Noun's components.

Schema Document Properties

Declared Namespaces

A schema can contain more than one namespace. According to Whatis.com, "In general, a namespace uniquely identifies a set of names so that there is no ambiguity when objects having different origins but the same names are mixed together." An example would be two namespaces that both defined an element called ID, without a namespace it would be impossible to determine which definition was being used.

Prefix	Namespace
Default namespace	http://www.starstandards.org/STAR
xml	http://www.w3.org/XML/1998/namespace
xsd	http://www.w3.org/2001/XMLSchema

Acknowledge Vehicle Remarketing

Components and Data Types

Global definitions include components, code lists, and data types. Components are used to build the data structures that make up a Noun and it's requirements. Data types specify the type of data that a component's fields may contain. Not all definitions are included in this documentation. Please see either the STAR Code List guideline or Data Type Guidelines for further information.

Acknowledge

Data Elements and Components

Acknowledge Vehicle Remarketing

Field / Component	Description	R/O	Business Rule
Acknowledge	The Acknowledge verb is used to acknowledge the application receipt of a Process request. This function conveys the result of the original request. An example of this is Acknowledge PO, where a Process PO has been issued and the corresponding business application acknowledges the receipt of the PO and responds with an acceptance or a counter offer. Annual percentage rate.

Name	AnnualPercentageRate
Abstract	no

XML Instance Representation

```
<...>  
  Percent  
</...>
```

ApplicationArea

These field(s) use this type: **ApplicationArea**.

Name	ApplicationArea
Abstract	no

Data Elements and Components

Field / Component	Description	R/O	Business Rule
Sender	Identifies characteristics and control identifiers that relate to the application that created the Business Object Document. The sender area can indicate the logical location of the application and/or database server, the application, and the task that was processing to create the BOD.	R	
CreationDateTime	is the date time stamp that the given instance of the Business Object Document was created. This date must not be modified during the life of the Business Object Document.	R	DateTime fields must be formatted as XML Schema Datetimes in UTC/GMT format without offsets. Example: 2003-11-05T13:15:30Z

Acknowledge Vehicle Remarketing

Field / Component	Description	R/O	Business Rule
Signature	If the BOD is to be signed the signature element is included, otherwise it is not. Signature supports any digital signature that maybe used by an implementation of OAGIS. The qualifyingAgency identifies the agency that provided the format for the signature. This element supports any digital signature specification that is available today and in the future. This is accomplished by not actually defining the content but by allowing the implementation to specify the digital signature to be used via an external XML Schema namespace declaration. The Signature element is defined to have any content from any other namespace. This allows the user to carry a digital signature in the xml instance of a BOD. The choice of which digital signature to use is left up to the user and their integration needs.	O	Optional. "qualifyingAgency" attribute.
BODId	The BODId provides a place to carry a Globally Unique Identifier (GUID) that will make each Business Object Document instance uniquely identifiable. This is a critical success factor to enable software developers to use the Globally Unique Identifier (GUID) to build the following services or capabilities: 1. Legally binding transactions, 2. Transaction logging, 3. Exception handling, 4. Re-sending, 5. Reporting, 6. Confirmations, 7. Security.	O	
Destination	Information related to the receiver of the BOD	R	See Destination Component.

XML Instance Representation

```
<...>
  <Sender> Sender </Sender> [1]
  <CreationDateTime> DateTime </CreationDateTime> [1]
  <Signature> Signature </Signature> [0..1]
  <BODId> Code </BODId> [0..1]
  <Destination> Destination </Destination> [1]
</...>
```

ApprovedAmount

These field(s) use this type: **ApprovedAmount**.

Attributes

Field / Component	Description	R/O	Business Rule
revision	This should contain the STAR repository version in the following recommended format. 4.2.1_M20080416. Where the first part indicates the version of the STAR repository and anything after the _ indicates the Milestone build that is being used. If referring to an official published version then only the STAR Repository version is required.	O	
release	Indicates the OAGIS release that this BOD belongs.	O	
environment	Indicates whether this BOD is being sent in a "Test" or a "Production" mode. If the BOD is being sent in a test mode, it's information should not affect the business operation. However, if the BOD is sent in "Production" mode it is assumed that all test has been complete and the contents of the BOD are to affect the operation of the receiving business application(s).	O	
lang	Indicates the language that the contents of the BOD is in unless otherwise stated.	O	
bodVersion	Deprecated as of STAR 4.2.2. It is recommended to use the revision attribute to identify the repository and the noun. May be removed in a new major version of the STAR repository. Indicates the version number of the BOD.	O

Destination

These field(s) use this type: Destination.

Name	Destination
Abstract	no

Data Elements and Components

Field / Component	Description	R/O	Business Rule
DestinationNameCode	Code for destination of file (i.e.Short Manufacturer or DSP code)	O	Must use a valid code from the ShortMfg/RSP list on http://www.starstandards.org
DestinationURI	Physical address of the destination	O	
DestinationSoftwareCode	Additional information about the destination application	O	

Acknowledge Vehicle Remarketing

Field / Component	Description	R/O	Business Rule
DestinationSoftware	For which software destination file is intended (may not be known).	O	
DealerNumber	Target Dealer Code receiving information	O	
StoreNumber	Dealer code store number (DMS assigned)	O	
AreaNumber	Dealer code area number (DMS vendor assigned)	O	
DealerCountry	Target Dealer country location	O	
PartyId	The Party Id field uniquely identifies the Receiver of the message. This element can be used for parties within the Automotive Community as well as external parties. Party Id is not intended as a replacement for the Dealer Number. Suggested formats for OEMs or other large institutions include: DUNs Number, ShortMfgCode + DUNs, or ShortMfgCode. The suggested format for Dealers is: ShortMfgCode+Dealer Number.	O	
LocationId	The Location Id field uniquely identifies the location of the Receiver of a message. This Id may be aligned with a physical address or data centers. This field provides an additional level of granularity beyond the usage of the Party Id for additional routing and deliver of data.		
ServiceId	The Service Id field identifies the particular service to which a message is being sent, e.g., an inventory service.	O

HeaderBase

Used on all STAR BODs

Name	HeaderBase
Abstract	no

Data Elements and Components

Field / Component	Description	R/O	Business Rule
DocumentDateTime	Is the date and time the document was last created. This is not the date and time that the BOD message instance was created.	O	Date/Time fields must be formatted as XML Schema DateTimes in UTC/GMT format without offsets. Example: 2003-11-05T13:15:30Z
SecondaryPassword	Secondary password used to validate access to the dealer information	O	
SecondaryDealerNumber	Identifies secondary dealer number if different than primary "Dealer Number"	O	

XML Instance Representation

```
<...>
  <DocumentDateTime> DocumentDateTime </DocumentDateTime> [0..1]
  <SecondaryPassword> SecondaryPassword </SecondaryPassword> [0..1]
  <SecondaryDealerNumber> SecondaryDealerNumber </SecondaryDealerNumber> [0..1]
</...>
```

Id

These field(s) use this type: **AuthorizationId**.

Party Identification number

Name	Id
Abstract	no

Acknowledge Vehicle Remarketing

XML Instance Representation

Sender

These field(s) use this type: **Sender**.

Name	Sender
Abstract	no

Data Elements and Components

Field / Component	Description	R/O	Business Rule
LogicalId	Provides the logical location of the server and applications from which the Business Object Document originated. It can be used to establish a logical to physical mapping, however its use is optional. Each system or combination of systems should maintain an external central reference table containing the logical names or logical addresses of the application systems in the integration configuration. This enables the logical names to be mapped to the physical network addresses of the resources needed on the network. Note: The technical implementation of this Domain Naming Service is not dictated by this specification. This logical to physical mapping may be done at execution time by the application itself or by a middleware transport mechanism, depending on the integration architecture used. This provides for a simple but effective directory access capability while maintaining application independence from the physical location of those resources on the network	O	
Component	Provides a finer level of control than Logical Identifier and represents the business application that issued the Business Object Document. Its use is optional. For STAR's use this is the DCS Software code name		
Task	Describes the business event that initiated the need for the Business Object Document to be created. For STAR, the task is defined in the Implementation Guidelines for each BOD. It is usually a short description of the BOD. Ex: SalesLead, CreditDecision, etc.	R	

Acknowledge Vehicle Remarketing

Field / Component	Description	R/O	Business Rule
ReferenceId	Enables the sending application to indicate the instance identifier of the event or task that caused the BOD to be created. This is used to correlate a response BOD to an originating BOD	O	
AuthorizationId	Identifies the authorization level of the user or application that is sending the Business Object Document Message. This authorization level being recognized by the receiving system indicates what can be done on the receiving system. For STAR, this is the User ID.	O	
CreatorNameCode	DCS Software Creator Code	R	
SenderNameCode	Additional information about the sending platform (i.e., Short MFG or DSP code).	R	Must use a valid code from the ShortMfg/RSP list on http://www.starstandards.org
SenderURI	Physical address of the sender	O	
DealerNumber	Dealer Code of source of information	O	Dealer Number is Required if originating from DMS.
StoreNumber	Dealer code store number (DMS assigned)	O	
AreaNumber	Dealer code area number (DMS vendor assigned)	O	
DealerCountry	Source Dealer country location	O	Reference Country enumerator.
Language	This code is used to define the language of the data used in this transaction	O	Reference Language enumerator.
DeliverPendingMailInd	Indicates if the user requests to receive pending mail that has been stored and has yet not been delivered yet. By selecting 0, the user will only receive the response for the current transaction the user is performing.	O	1 - Receive Pending Mail. 0 - Do not receive pending mail.
Password	Token for application specific authentication. Used to authenticate dealership/users through application specific security	O	
SystemVersion	The sender's software version number.	O	

Acknowledge Vehicle Remarketing

Field / Component	Description	R/O	Business Rule
PartyId	The Party Id field uniquely identifies the Sender of the message. This element can be used for parties within the Automotive Community as well as external parties. Party Id is not intended as a replacement for the Dealer Number. Suggested formats for OEMs or other large institutions include: DUNs Number, ShortMfgCode + DUNs, or ShortMfgCode. The suggested format for Dealers is: ShortMfgCode+Dealer Number.	O	
LocationId	The Location Id field uniquely identifies the location of the Sender of a message. This Id may be aligned with a physical address or data centers. This field provides an additional level of granularity beyond the usage of the Party Id for additional routing and deliver of data.	O	
ServiceId	The Service Id field identifies the particular service from which a message is being sent, e.g., an inventory service.	O

AccountingDate

Month and year accounting date conforms to ISO 8601 format rules Ex: \d\d\d\d-\d\d

Name	AccountingDate
*Base XSD Type: gYearMonth	

AddressLine

Acknowledge Vehicle Remarketing

These field(s) use this type: **AddressLine**.

Indicates the multiple lines of an address. The first line is typically the street name and number.

Name	AddressLine
------	-------------

*Base XSD Type: string

AdvertisingCopy

These field(s) use this type: **AdvertisingCopy**.

Information that goes in the ad.

Name	AdvertisingCopy
------	-----------------

*Base XSD Type: string

AdvertisingMedia

These field(s) use this type: **AdvertisingMedia**.

Media where ad is placed. Ex: Internet, newspaper, etc

Name	AdvertisingMedia
------	------------------

*Base XSD Type: string

ApprovedInd

These field(s) use this type: **ApprovedInd**.

Approved Indicator

Name	ApprovedInd
------	-------------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

Code Value	Description
0	
1	

BodyStyle

These field(s) use this type: **BodyStyle**.

Manufacturer-assigned vehicle body style

Name	BodyStyle
------	-----------

*Base XSD Type: string

BrandedTitleDate

These field(s) use this type: **BrandedTitleDate**.

Branding Date

Name	BrandedTitleDate
------	------------------

*Base XSD Type: date

BrandedTitleInd

These field(s) use this type: **BrandedTitleInd**.

This tag indicates if a vehicle's title has been branded. (i.e., vehicle totaled and state registration title branded as such)

Name	BrandedTitleInd
------	-----------------

*Base XSD Type: string

Code Value	Description
0	

Acknowledge Vehicle Remarketing

Data

These field(s) use this type: **Data.**

Container to carry embedded data

Name	Data
------	------

*Base XSD Type: string

Date

Date conforms to ISO 8601 format rules EX: \d\d\d\d-\d\d-\d\d

Name	Date
------	------

*Base XSD Type: date

Acknowledge Vehicle Remarketing

DateTime

These field(s) use this type: CreationDateTime.

Date and time conforms to ISO 8601 format rules without offset EX:2003-11-05T13:15:30Z

Name	DateTime
------	----------

*Base XSD Type: dateTime

DealerName

These field(s) use this type: DealerName.

Dealer name

Name	DealerName
------	------------

*Base XSD Type: string

Decimal

Decimal

Name	Decimal
------	---------

*Base XSD Type: decimal

DeliveryDate

These field(s) use this type: DeliveryDate.

The date of original retail vehicle sale

Name	DeliveryDate
------	--------------

*Base XSD Type: date

Acknowledge Vehicle Remarketing

DistrictCode

These field(s) use this type: DistrictCode.

Manufacturer Assigned District Code

Name	DistrictCode
------	--------------

*Base XSD Type: string

DocumentDateTime

These field(s) use this type: DocumentDateTime.

Is the date and time the document was last created. This is not the date and time that the BOD message instance was created.

Name	DocumentDateTime
------	------------------

*Base XSD Type: dateTime

DoorKeyNumber

These field(s) use this type: DoorKeyNumber.

Door Key Number

Name	DoorKeyNumber
------	---------------

*Base XSD Type: string

DriveTrain

These field(s) use this type: DriveTrain.

Indicates whether the vehicle is 2 or 4 wheel drive (ie: 2WD, 4WD, 4x4, 4x2)

Name	DriveTrain
------	------------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

DriveType

These field(s) use this type: **DriveType**.

Designates vehicle drive type

Name	DriveType
*Base XSD Type: string	
Code Value	Description
Front	Front wheel drive
Rear	Rear wheel drive

EncodingBase

Encoding values for embedded documents

Name	EncodingBase
*Base XSD Type: string	
Code Value	Description
base64	Base 64
octal	Octal
binary	Binary
plainText	Plain Text
other	
N/A	Not Applicable

EngineConfiguration

Acknowledge Vehicle Remarketing

These field(s) use this type: **EngineConfiguration**.

Type of engine configuration

Name	EngineConfiguration
*Base XSD Type: string	
Code Value	Description
horizontal	Horizontal engine configuration
in-line	In-line engine configuration
rotary	Rotary engine configuration
V-type	V-type engine configuration
W-type	W-type engine configuration
other	
N/A	Not Applicable

EngineDisplacement

These field(s) use this type: **EngineDisplacement**.

Displacement of engine (i.e., amount of volume in the cylinders)

Name	EngineDisplacement
*Base XSD Type: string	
Code Value	Description
ci	ci - Cubic Inches
cc	cc - Cubic Centimeters
liters	liters
other	

Acknowledge Vehicle Remarketing

Code Value	Description
N/A	Not Applicable

EngineHorsepower

These field(s) use this type: **EngineHorsepower**.

Engine horsepower rating

Name	EngineHorsepower
------	------------------

*Base XSD Type: string

EngineInduction

These field(s) use this type: **EngineInduction**.

Engine induction

Name	EngineInduction
------	-----------------

*Base XSD Type: string

Code Value	Description
turbo	Turbo engine induction
supercharger	Supercharger engine induction
twin-turbo	Twin-turbo engine induction
normally aspirated	Normally aspirated engine induction
other	
N/A	Not Applicable

Acknowledge Vehicle Remarketing

EngineNumber

These field(s) use this type: EngineNumber.

Serial number of the engine if vehicle not made for US sale

Name	EngineNumber
------	--------------

*Base XSD Type: string

ExpirationDate

These field(s) use this type: ExpirationDate.

Expiration Date

Name	ExpirationDate
------	----------------

*Base XSD Type: date

ExteriorColor

These field(s) use this type: ExteriorColor.

Vehicle Exterior Color(s)

Name	ExteriorColor
------	---------------

*Base XSD Type: string

ExteriorColorCode

These field(s) use this type: ExteriorColorCode.

Vehicle exterior color code

Name	ExteriorColorCode
------	-------------------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

FamilyName

These field(s) use this type: **FamilyName**.

Last Name of business party

Name	FamilyName
-------------	-------------------

*Base XSD Type: string

FinanceCompanyName

These field(s) use this type: **FinanceCompanyName**.

Name of Finance Company

Name	FinanceCompanyName
-------------	---------------------------

*Base XSD Type: string

FinanceType

These field(s) use this type: **FinanceType**.

Type of financing Examples may be F- Finance, L - Lease, C-Cash, 1-Retail, 2-Lease, 3-Balloon, etc.

Name	FinanceType
-------------	--------------------

*Base XSD Type: string

FinancingAvailableInd

These field(s) use this type: **FinancingAvailableInd**.

Indicates is someone is offering financing

Name	FinancingAvailableInd
-------------	------------------------------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

Code Value	Description
0	
1	

FleetAccount

These field(s) use this type: **FleetAccount**.

Manufacturer defined fleet account number

Name	FleetAccount
------	--------------

*Base XSD Type: string

FormattedName

These field(s) use this type: **FormattedName**.

Full Name of business party. Format for name should be "First Last" with no commas between first and last name

Name	FormattedName
------	---------------

*Base XSD Type: string

FuelType

These field(s) use this type: **FuelType**.

Type of vehicle fuel

Name	FuelType
------	----------

*Base XSD Type: string

Code Value	Description
diesel	Diesel Fuel

Acknowledge Vehicle Remarketing

Code Value	Description
premium unleaded	Premium Unleaded Fuel
unleaded	Unleaded Fuel
natural gas	Natural Gas
electric	Electric
ethanol	Ethanol is an alternative automotive fuel derived from grain and corn; usually blended with gasoline to form gasohol.
propane	Propane
hybrid	Hybrid is a vehicle that uses two or more distinct power sources to propel the vehicle
Other	Other
N/A	Not Applicable

GivenName

These field(s) use this type: **GivenName**.

First Name of business party

Name	GivenName
------	-----------

*Base XSD Type: string

IgnitionKeyNumber

These field(s) use this type: **IgnitionKeyNumber**.

Vehicle Ignition Key Number

Name	IgnitionKeyNumber
------	-------------------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

ImageAlternateText

These field(s) use this type: **ImageAlternateText**.

Image alternate text. Example: "1997 Honda Accord"

Name	ImageAlternateText
------	--------------------

*Base XSD Type: string

ImageAttachmentTitle

These field(s) use this type: **ImageAttachmentTitle**.

Image attachment title

Name	ImageAttachmentTitle
------	----------------------

*Base XSD Type: string

Indicator

These field(s) use this type: **DeliverPendingMailInd.**

0 = No, 1 = Yes

Name	Indicator
------	-----------

*Base XSD Type: string

Code Value	Description
------------	-------------

0	
---	--

1	
---	--

InteriorColor

These field(s) use this type: **InteriorColor**.

Acknowledge Vehicle Remarketing

Vehicle Interior Color(s)

Name	InteriorColor
------	---------------

*Base XSD Type: string

InteriorColorCode

These field(s) use this type: **InteriorColorCode**.

Vehicle Interior color code

Name	InteriorColorCode
------	-------------------

*Base XSD Type: string

Language

These field(s) use this type: **Language,Language**.

Language conforms to ISO 639-2 rules. Note the format for this field is language-Country (see Country data type for the list of countries with definitions). LastModificationDate

These field(s) use this type: LastModificationDate.

Last date modification was made

Name	LastModificationDate
------	----------------------

*Base XSD Type: date

LicenseNumber

These field(s) use this type: LicenseNumber.

State License plate number of vehicle

Name	LicenseNumber
------	---------------

*Base XSD Type: string

Make

These field(s) use this type: Make.

Vehicle make code - Usually available in the VIN number (use NCIC code).

Name	Make
------	------

*Base XSD Type: string

Acknowledge Vehicle Remarketing

Manufacturer

These field(s) use this type: **Manufacturer.**

Manufacturer Name

Name	Manufacturer
-------------	---------------------

*Base XSD Type: string

MaturityDate

These field(s) use this type: **MaturityDate.**

Month and year of contract maturity

Name	MaturityDate
-------------	---------------------

*Base XSD Type: gYearMonth

MiddleName

These field(s) use this type: **MiddleName.**

Middle Initial of business party

Name	MiddleName

Fields and Global Attributes

Global declarations are items such as elements, attribute groups, and group definitions. These items are not defined within any particular component. A component may reference these definitions. Within a STAR XML Schemas these are typically known as global fields.

Acknowledge

These field(s) use this type: **Acknowledge**.

The Acknowledge verb is used to acknowledge the application receipt of a Process request. This function conveys the result of the original request. An example of this is Acknowledge PO, where a Process PO has been issued and the corresponding business application acknowledges the receipt of the PO and responds with an acceptance or a counter offer.

Name	Acknowledge
